

# WAFINI SEED INVESTMENT PITCH DECK

Wafini is a DAO powered NFT marketplace on the cardano blockchain that seeks to provide the governance token holders utilities and features never seen before on the cardano ecosystem.

# OVERVIEW

Wafini will be the first NFT marketplace that will reward its Governance Token and NFT holders with a percentage of the marketplace's transaction commissions. We are developing not just a Marketplace where creators & enthusiasts can buy, sell, mint or trade their NFTs, we are building a community of creators and collectors all united by the \$WFI governance token and Genesis NFTs.

Our Value Proposition is that Wafini will empower the token and NFT holders with utilities and features that will improve and enhance the adoption of Cardano.
